

ABOUT ISVIB

Indian Society for Veterinary Immunology and Biotechnology (ISVIB) is the premier conglomerate organization of more than 1000 veterinary and animal scientists from various disciplines of Biotechnology, Immunology, Microbiology, Pathology, Preventive Medicine, Parasitology, Animal Reproduction, Animal Physiology, Animal Genetics & Breeding, Nutrition, Fishery and other related disciplines with the objective of fostering growth of veterinary immunology and biotechnology in the era of biological technology. The ISVIB organizes annual conventions to critically evaluate and mitigate challenges faced by veterinary and animal health care professionals through ways and means of biotechnology. The present national conference will also focus on various issues related to livestock and poultry production and discuss the modality as to how to use these innovative branches of science more effectively for wellbeing of livestock and poultry.

ABOUT THE ORGANISER

Krantisinh Nana Patil College of Veterinary Science, Shirwal is placed majestically on the picturesque background of Sahyadri hills, was established in December, 1988 under the auspices of Mahatma Phule Krishi Vidyapeeth, Rahuri, Maharashtra. In order to honour contributions made by Krantisinh Nana Patil to the Indian freedom struggle, this institute has been named as Krantisinh Nana Patil College of Veterinary Science. Nana Patil, a great freedom warrior and social reformer is remembered for his parallel government through which he fought with the erstwhile British regime. Consequent upon establishment of Maharashtra Animal and Fishery Sciences University at Nagpur, the institute was transferred under its control in the year 2000. Over the past two and half decades, the institute has succeeded in providing excellent academic environment and nurturing the budding veterinarians.
